

# Daniela Rittmeier

Daniela Rittmeier is a supervisory board member, distinguished thought leader, C-level advisor and head of the Generative AI Accelerator at Capgemini. With over 20 years of experience in initiating, managing and implementing complex transformation projects, Daniela Rittmeier brings in-depth expertise in industries such as life sciences, healthcare, automotive and information technology. Her focus is on combining technological innovation with strategic corporate development. There is enormous interest in generative and agent-based artificial intelligence. Although AI has been with us since the last century, it is only with the widespread availability of generative tools such as ChatGPT that the topic has entered...
