

Staffan Reveman

As an energy expert, Staffan Reveman specialises in the analysis of energy-intensive industries, energy policy and the growing demands of digital infrastructures. In his presentations, he addresses the question of how the rising energy demands of industry, data centres and digital services can be reconciled with climate targets, security of supply and economic competitiveness. Staffan Reveman Lecture topics Industry under pressure – How energy-intensive industries must prepare for the futureThe impact of electrification, grid expansion and electricity prices on steel, chemicals, data centres and AI infrastructures. Between NetZero and Blackout – How secure is our electricity supply really?Analysis of security...
