

# Dr. Henning Beck

Dr. Henning Beck, biochemist and neuroscientist, takes us behind the scenes of the most flawed and at the same time most innovative structure ever on earth – the human brain. An organisation full of weaknesses – and yet more powerful than any supercomputer. A network with effective information transfer – more agile than any team trimmed for productivity. Neuroscience is an exciting thing. And that is exactly what Henning Beck conveys in his lectures. Fresh, modern, entertaining: science at first hand and up close. In his keynotes, Henning Beck shows why the human brain needs distraction to be creative. Why...
