

Felix Strobl

MSC NEUROSCIENCE · KING'S COLLEGE LONDON · AVAILABLE
IN DE / EN / FR

MSc Neuroscience - King's College London
Innovation Advisor - Ageing Research at King's (ARK)

Scientific Manager - European Society of Preventive Medicine

Business Dev. Manager - Ayus Medical Devices AG, Zug

Initiator - MEA Long Covid Music Programme

Trained Tenor - International Stage Experience

SIGNATURE KEYNOTE

"Where Opera Meets Neuroscience - and the Stage Becomes a Laboratory for Human Resilience"

Felix Strobl does not take to the stage with a presentation. He takes to it with his voice. Before a single word about neuroscience is uttered, the audience has already experienced a measurable shift in the nervous system. In an era saturated with AI sessions, this is the human counterbalance.

WHAT MAKES IT DIFFERENT

Multi-sensory by design

Opens with live vocal performance. Audiences experience the nervous system shift before the science explains it.

Audience becomes the experiment

Collective humming, guided breathing, and real-time brainwave measurement turn listeners into active participants.

Science-backed

Rooted in neuroscience from King's College London. Every exercise is grounded in evidence on breathing and brain waves.

The AI antidote

While most sessions add to information load, this keynote actively counters it - restoring focus and resilience.

WHAT EVENT ORGANISERS SAY

"Armed with knowledge, a piano and his voice, he won over our audience of health professionals and entrepreneurs. Knowledge transfer in an entertaining way!"

Organisers Team - Big Bang AI Festival, Berlin, Germany

"His piano opening and interactive breathing exercise offered our attendees a multi-sensory experience that went beyond the traditional keynote format."

Vanessa Reis, Head of Zurich Convention Bureau, Zurich, Switzerland - Future of Healthcare Meetings Forum 2024

"He delivered an insightful presentation on breathing techniques for high-stress situations. Engaging, informative, and entertaining - his contribution was truly appreciated."

Davi Kaur, CEO - European Society for Emergency Medicine (EUSEM), Vienna

IDEAL FOR

Association Annual Events

Opening / Closing Keynote

Healthcare Conferences

AI & Tech Summits

Leadership & HR Events

Medical & Education Congresses

Corporate Well-being Days

SPEAKING TOPICS

Breathing and nervous system regulation
Burnout prevention and resilience
Music, emotion, and brain science

Neuroplasticity and lifelong learning
Human intelligence in the age of AI
Digital transformation and mental health

FORMAT

45-90'

KEYNOTE DURATION

LANGUAGES

German

English

French

ON STAGE

Live vocal performance
Grand piano
Interactive audience exercises
Real-time brainwave demo
Immersive in-room walk

AS SEEN AT

Big Bang AI Festival, Berlin
Future of Healthcare Forum, Zurich
EUSEM Congress, Vienna
BBNS Annual Conference
